Summary

Mobile developer with around 8 years of experience building clean and maintainable software for a wide range of businesses ranging from Augmented Reality to Financial Services. Possess a strong technical background with a Masters Degree in Computer Engineering from the University of Florida. Lots of experience working in agile teams and also some independently as the only developer. Currently looking for a challenging new role and some fun people to work with. I have been living in the Netherlands for more than 5 years now and can speak Dutch as well :)
